Candidates should check the question paper to ascertain that all the pages are printed as
indicated.**

INSTRUCTIONS TO THE CANDIDATE

Kenya Health Information System (KHIS) report of 2022 has revealed a high rate of defaulting among HIV/AIDS patients in your community health unit. A response programme which required community health volunteers to conduct defaulter tracing has been initiated. As the community health officer, you are to perform the following tasks;

TASK 1

- a) Prepare to conduct a training.

TASK 2

- b) Train the community health volunteers on FIVE possible reasons of defaulting among HIV/AIDS patients.

TASK 3

- c) Conduct a training on FIVE steps followed while carrying out defaulter tracing.

TASK 4

- d) Training community health volunteers on FOUR challenges experienced during defaulter tracing.

TASK 5

- e) Use the locator form provided and demonstrate capturing of the patient details (use one of the simulated community health volunteers as a patient).

You have been allocated 20 minutes for preparation and 40 minutes for the training.

You are provided with the following resources.

1. Simulated environment
2. Simulated Community Health Volunteers
3. Client locator form
4. Flip charts/white board
5. Marker pen
6. Masking tape
7. Pens
8. Foolscaps
9. A table
10. Chairs
