**PRACTICAL ASSESSMENT**

**Time: 1 Hour**

**This paper consists of Two (2) printed pages.  
Candidate should check the question paper to ascertain that all pages are  
printed as indicated.**

**INSTRUCTIONS TO CANDIDATE:**

You are the community health volunteer working in Suna community health unit attached to Kabure village in Nyakongo, Omwenda location. During your routine household visit, you encountered a caregiver with an under-five years old child who had a health problem.

You decided to perform a clinical assessment to the child and obtained the following results;

1. Rapid diagnostic test for malaria indicated positive result
2. MUAC reading was severe

In this practical assessment, you are expected to perform the following task.

**TASK 1**

- a) Prepare to conduct the referral using tool X

**TASK 2**

- b) Link the child to Kambare dispensary

You have been 15 minutes for preparation and 45 minutes to performing tasks.

You are provided with the following resources to carry out the tasks:

- i. Simulated caregiver
- ii. Dummy for under-five
- iii. Tool X
- iv. A pen
- v. 2 chairs
